PROFESSIONAL SUMMARY

Full-stack software engineer with 6+ years of experience spanning Enterprise Resource Planning (ERP) development, academic research applications, and enterprise logistics software. Proven track record of leading tech stack modernizations, third-party API integrations, and infrastructure overhauls across banking, logistics, energy, and academia. Adept at client communications, architectural decision-making, and delivering end-to-end solutions in both team and independent settings.

SKILLS

Languages: TypeScript, JavaScript, Java, Go, Python, PHP, C#, Kotlin

Frontend: React, Angular, Next.js, TailwindCSS, HTML, CSS (Cascading Style Sheets)

Backend: Node.js, Express, Fastify, Spring, Echo

Database: PostgreSQL, Microsoft SQL Server, MySQL, MariaDB, MongoDB, Redis

DevOps & Infrastructure: Docker, Kubernetes (K8s), Jenkins, CI/CD (Continuous Integration/Continuous Deployment), CircleCI, GitHub Actions, GitLab CI/CD, Linux

Other: Git, Apache Kafka, Jira, Figma, React Native, SVN (Subversion)

WORK EXPERIENCE

Humanitarian Software LLC

Software Engineer — Central, SC | May 2023 – Present

- Lead development on HELM (Humanitarian Enterprise Logistics Manager), the company's flagship logistics management software, driving tech stack modernization and third-party integrations
- Architect and implement integrations with DocuSign, FusionPro, Salesforce, and FedEx APIs, streamlining document signing, print workflows, CRM sync, and shipping across the platform
- Lead migration of FedEx integration from legacy SOAP to REST API, reducing integration latency by ~40% and improving long-term maintainability
- Spearhead migration from PHP/jQuery to modern Fastify, React, and TypeScript stack, cutting page load times by ~60% and delivering module-by-module with regular stakeholder updates
- Design and implement Redis caching and Apache Kafka messaging, reducing average API response time by ~65% and enabling real-time event streaming across 5+ services
- Build complex UI components (virtual scroll, data grid) handling 10,000+ row datasets with no perceptible lag
- Integrate LLM capabilities via OpenAI, Google Gemini, and Anthropic Claude APIs, enabling AI-assisted workflows within the platform
- Establish Google Kubernetes Engine (GKE) deployment with Helm charts and GitLab CI/CD pipelines, replacing manual Windows Server deployments and SVN

Technologies: SQL Server, Java, Spring, PHP, React, TypeScript, Fastify, Node.js, Python, Redis, Apache Kafka, GKE, Kubernetes, Docker, GitLab CI/CD

BRID Systems

Senior Software Engineer & Consultant (Part-Time) — Remote | Jan 2024 – Present

- Migrated legacy JSP (JavaServer Pages) applications to modern React frontend, reducing page load time by ~70%
- Overhauled legacy RPC-based backend to RESTful API architecture in Java, cutting average API response time by ~55%
- Led migration from SVN to Git-based workflow, reducing merge conflicts and establishing modern version control practices
- Introduced Docker-based deployment, cutting environment provisioning time from several hours to under 10 minutes

Technologies: Java, React, Docker, Git, REST API

Clemson University

Research Assistant — Clemson, SC | Oct 2022 – May 2023

- Designed, developed, and deployed two full-stack web applications for academic research groups, working directly with faculty and research teams
- Built PREDICT for the Materials Computation and Data Science (MCDC) research group, providing public access to machine learning models for alloy property prediction
- Developed database application for Savannah River National Laboratory (SRNL) enabling access to research on glasses for nuclear waste storage
- Made architectural decisions on tech stack and system design, delivering both applications within a 7-month timeline

Technologies: PostgreSQL, MongoDB, Go, React, TypeScript, TailwindCSS, Docker, Linux

Krung Thai Bank

Full Stack Go Developer — Remote (Thailand) | Sep 2021 – Dec 2023

- Contributed to large-scale migration of legacy .NET information system to microservices architecture with CI/CD and Kubernetes deployment
- Built CI/CD pipelines on Jenkins and deployed to Kubernetes cluster, reducing deployment time by ~60%
- Optimized system performance, achieving 2x speed improvement for large financial report generation

Technologies: PostgreSQL, Redis, Go, Angular, C#, Node.js, Kubernetes, Docker, Kafka, Jenkins

Buzz Freeze Solution

Full Stack Developer (Contract) — Bangkok, Thailand | Jun 2021 – Sep 2021

- Sole architect and developer of NIDA Smart Energy, a building energy management system for a prestigious Thai graduate school
- Built full-stack energy monitoring system that helped reduce campus energy consumption by 25%
- Advised on and contributed to projects with PTT and SCG, supporting 2 major enterprise clients

Technologies: MariaDB, Node.js, Express, React, Docker, Linux

Agoda Company

DevOps SRE Intern — Bangkok, Thailand | Jun 2020 – Aug 2020

- Owned full-stack development of internal ticket management system used across departments
- Debugged and refactored legacy code, improving overall system throughput by ~3x
- Reduced response time by 50% for NOC team by enabling real-time issue monitoring

Technologies: SQL Server, Node.js, Express, React, Docker, GitHub Actions

BRID Systems

ERP Developer (Java) — Bangkok, Thailand | Jul 2017 – May 2020

- Developed and customized PlanetOne ERP (Enterprise Resource Planning) system across 8 modules: Sales Order, Purchase Request/Order, Work Order, Inventory, Sales, Procurement, and Warehouse Management
- Collaborated with system implementers to translate client requirements into working solutions
- Deployed systems on-site at client facilities and on company Linux servers

Technologies: Java, PostgreSQL, Linux, Subversion

EDUCATION

Master of Science in Computer and Information Science

Clemson University, School of Computing | Clemson, SC | Jan 2022 – May 2023 | GPA: 3.9/4.0

Bachelor of Engineering in Information and Communication Engineering

Chulalongkorn University, International School of Engineering | Bangkok, Thailand | 2017 – 2021 | GPA: 3.27/4.0

LANGUAGES

Thai (Native) · English (Native/Bilingual) · German (B1)
